

COVID PROTOCOL EDUCATION BUILDING

The following is written guidance for any Covid-19 related procedure specific to the education building in efforts to reduce the risk of infection to any camp participants, their families, and our staff during summer programming of 2021. Protocol is in consideration to current CDC recommendations.

- All staff, campers, and attending members of the public are required to wear a mask in alignment with wider AAWL & SPCA policy.
- Camper with 100.4-degree temperature or higher will not be allowed to attend camp.
- Children attending camp will wash or sanitize their hands in the breezeway before entering the building.
- Children will wash their hands before and after lunch and are expected to do so after using the bathroom.
- Camp members will wash or sanitize their hands before exiting the building and entering their pick-up vehicle.
- Surfaces will be disinfected at the end of each day.
- Students will have assigned supplies that will be disinfected at the end of each camp rotation.
- Any child that shows signs of illness during camp will be isolated and parents or guardians will be called to come pick them up for the day.

These directives are subject to change based on CDC recommendation, greater AAWL & SPCA policies, or other important considerations as they appear. Camp participants will be notified of any changes to protocol, as well as any known possible COVID cases within a current camp session.
